EnterpriseTraining Solutions™
#1 IN PUBLIC SECTOR ELEARNING

CADLearning®

Transform the Way You Learn
Autodesk Software eLearning

Featuring over 35,000 lessons on more than 50 Autodesk programs, CADLearning offers the most comprehensive library of Autodesk learning content in the world.

Lessons are atomized to cover just one function or feature and can be used as building blocks for A-Z training, just-in-time performance support, or as a bridge to cover the delta between Autodesk subscription updates.

Find the exact content you need to maximize your productivity with tools like global search, custom learning paths, and in-application contextual lessons.

Assessments generate individualized learning paths targeted to your knowledge gaps, providing just the content you need to master tasks and avoid redundant learning.

With CADLearning content available via the web, mobile apps for iOS and Android, and directly in the Autodesk application, expert help is always a click away.

What's included?

- Unlimited access to the full CADLearning library
- Frequently updated content published in alignment with Autodesk dot releases
- Mobile apps for iOS and Android
- Plug-in that provides contextual lesson suggestions as you work in a supported Autodesk software program
- Assessments to help identify and fill skills and knowledge gaps
- Ability to create video playlists for quick access to frequently-referenced lessons
- Exercise files for hands-on practice

CADLearning can be used to:

- Overcome roadblocks in your design work
- Learn a new program from A-Z
- Build custom learning paths
- Quickly master to new releases of Autodesk software
- Reinforce instructor-led training
- Prepare for Autodesk Certification

$359ea (Quantity Discount Available)

Subscription includes unlimited access to all video courses for one year. Available on government contract (Federal GSA, CMAS, TX DIR, NY OGS)
