

## HANDS ON TRAINING WITH INSTANT LEARNER FEEDBACK

Crush the learning curve with training that is self guided, interactive and lab based resulting in new skills that can be applied now.

## UPLEVEL TECHNICAL LEARNING

It's a constant challenge to prepare your data and programming professionals to take on rapid technology change. Codecademy for Enterprise can help enhance skill retention through interactive courses, personalized practice environments, and collaborative assessment tools needed to close skill gaps, increase performance and fuel growth.

## BENEFITS OF CODECADEMY FOR ENTERPRISE.

### MASTER THE FUNDAMENTALS

Help employees develop skill proficiency through focused learning paths comprised of multiple interactive learning modalities.

### ENGAGE IN INTERACTIVE LEARNING

Two-way, interactive training offering immediate feedback and hands-on practice opportunities.

### PERSONALIZE YOUR PRACTICE

Customize to your employees' needs and provide AI-driven Smart Practice, Guided or Freeform Practice.

### GAIN SUPPORT FROM A COMMUNITY OF PEERS

Facilitate connections and collaboration for your employees amongst learners from all over the world.

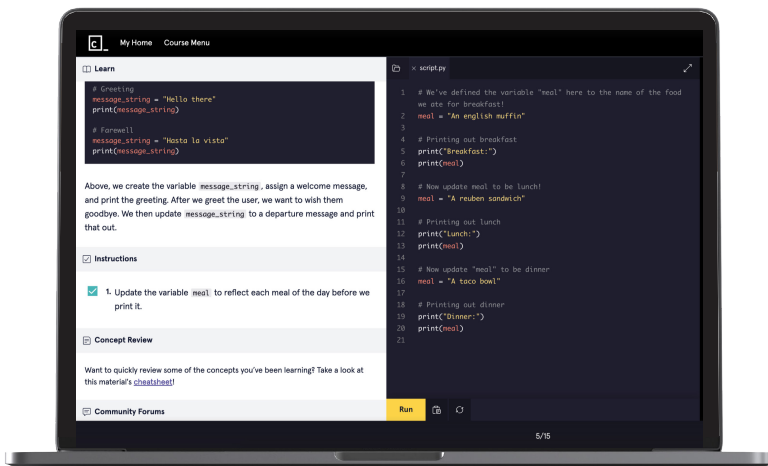

## WE TEACH THE HOW AND WHY OF LEARNING TO CODE.

Whether your need is for onboarding, upskilling or reskilling, Codecademy's immersive, self-paced coding practice environment expands your multimodal learning experience for programming and data professionals.

**HTML & CSS, Python, JavaScript, Java, SQL, Bash/Shell, Ruby, C++, R, C#, PHP, Go, Swift, Kotlin**

Codecademy for Enterprise offers interactive, hands-on practice environments in **14 programming languages** across multiple domains such as application development and data science.

# CODECADEMY FOR ENTERPRISE OFFERING.

Unlock your team's potential with the foundational programming and data knowledge that gives them experience and confidence to tackle any coding project.

Using a hierarchical approach to learning, Codecademy for Enterprise guides a user through educational learning objectives and structures the curriculum to write, edit, practice and apply coding skills to real-world situations.

Codecademy's immersive, self-paced coding practice environment expands your multimodal learning experience for programming and data professionals.

## LEARNING THAT LASTS

*"My employees progressed from zero to 100 very quickly using the Codecademy system. It has completely changed what they can do to implement their own innovations..."*

**Matthew Marsh, Fleetpride**
